

Cost of Delay

The Results show how much money you could have at Retirement if you begin investing this year. Because everyone has many things that they'd like to buy when they're younger (like a new car or a great trip), it's easy to put off investing for a few years. However, you may be surprised at how much even a short delay can cost you. Go to What If and try delaying your investment. Start with 1, 2, 3 or more years, and see what happens.

Results

You will have this amount at Retirement if you begin investing now :

\$ 1,033,901

But if you delay for this amount of time...

20

years

You will only accumulate this amount by Retirement :

\$ 162,913

Which means that your Delay cost you this much :

\$ 870,988

What If?

See what happens if you Delay the start of your investing by 1, 2, 3 or more years...

Delay for this Number of Years :

-

20

+
